

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

## Experiment - 7

**Student Name:** Ronak Jain

**UID:** 23BCS10225

**Branch:** BE-CSE

**Section/Group:** KRG-2B

**Semester:** 5<sup>th</sup>

**Date of Performance:** 15/10/25

**Subject Name:** Project Based Learning in Java

**Subject Code:** 23CSH-304

### **Aim:**

To build a Java program that performs CRUD (Create, Read, Update, Delete) operations on a Product table using JDBC with transaction handling.

### **Objective:**

To learn how to implement CRUD operations using JDBC, apply transaction handling, and use a menu-driven program for database operations.

### **Apparatus / Input Used:**

- Java (JDK 8 or above)
- MySQL Database
- JDBC API
- MySQL Table: **Product(ProductID, ProductName, Price, Quantity)**
- IDE: Eclipse / IntelliJ / VS Code

### **Procedure:**

1. Create a MySQL table **Product(ProductID, ProductName, Price, Quantity)**
2. Load the MySQL JDBC Driver using Class.forName()
3. Establish a connection using DriverManager.getConnection()
4. Create a menu-driven program with options: Add, View, Update, Delete
5. Use **PreparedStatement** for secure queries
6. Use connection.setAutoCommit(false) for manual transaction mode
7. Use commit() on successful operations
8. Use rollback() on errors
9. Close all JDBC resources properly (Connection, Statement, ResultSet)

## **Program Code:**

```
import java.sql.*;
import java.util.Scanner;

public class ProductCRUD {
    public static void main(String[] args)
    { Scanner sc = new Scanner(System.in);

        try
        { Class.forName("com.mysql.cj.jdbc.Driver");
            Connection con = DriverManager.getConnection(
                "jdbc:mysql://localhost:3306/testdb", "root", "password"
            );

            con.setAutoCommit(false);
            int choice;

            while (true) {
                System.out.println("\n--- Product Management Menu ---");
                System.out.println("1. Add Product");
                System.out.println("2. View All Products");
                System.out.println("3. Update Product");
                System.out.println("4. Delete Product");
                System.out.println("5. Exit");
                System.out.print("Enter choice: ");
                choice = sc.nextInt();

                if (choice == 1) {
                    PreparedStatement ps =
                        con.prepareStatement( "INSERT INTO
                            Product VALUES (?, ?, ?, ?)"
                    );
                    System.out.print("Enter Product ID: ");
                    ps.setInt(1, sc.nextInt());
                    System.out.print("Enter Product Name: ");

```

```

        ps.setString(2, sc.next());
        System.out.print("Enter Price: ");
        ps.setDouble(3, sc.nextDouble());
        System.out.print("Enter Quantity: ");
        ps.setInt(4, sc.nextInt());
        ps.executeUpdate();
        con.commit();
        System.out.println("Product Added Successfully!");
    }
else if (choice == 2) {
    Statement st = con.createStatement();
    ResultSet rs = st.executeQuery("SELECT * FROM Product");
    while (rs.next()) {
        System.out.println(rs.getInt(1) + " | "
        + rs.getString(2) + " | " + rs.getDouble(3)
        + " | " + rs.getInt(4));
    }
}
else if (choice == 3) {
    PreparedStatement ps = con.prepareStatement(
        "UPDATE Product SET Price=?, Quantity=? WHERE
        ProductID=?"
    );
    System.out.print("Enter Product ID: ");
    ps.setInt(3, sc.nextInt());
    System.out.print("Enter New Price: ");
    ps.setDouble(1, sc.nextDouble());
    System.out.print("Enter New Quantity: ");
    ps.setInt(2, sc.nextInt());
    ps.executeUpdate();
    con.commit();
    System.out.println("Product Updated Successfully!");
}
else if (choice == 4) {
    PreparedStatement ps =
        con.prepareStatement( "DELETE FROM
        Product WHERE ProductID=?"
    );
}

```

```

        System.out.print("Enter Product ID: ");
        ps.setInt(1, sc.nextInt());
        ps.executeUpdate();
        con.commit();
        System.out.println("Product Deleted Successfully!");
    }
    else if (choice == 5)
    {
        System.out.println("Exiting..
        ."); break;
    }
    else {
        System.out.println("Invalid Choice");
    }
}
con.close();
} catch (Exception e)
{
    System.out.println("Error! Rolling
    Back...");
}
}
}
}

```

**Sample Output:**

--- Product Management Menu ---

1. Add Product
2. View All Products
3. Update Product
4. Delete Product
5. Exit

Enter choice: 1

Enter Product ID: 101

Enter Product Name: Pen

Enter Price: 10

Enter Quantity: 100

Product Added Successfully!

Enter choice: 2

101 | Pen | 10.0 | 100
